

# HACK UCONN

Innovating Sustainability

## What is HackUConn?

HackUConn is a 24-hour marathon event that brings together students of all disciplines in hopes of finding innovative solutions for today's biggest problems. Not a programmer or a coder? Not a problem! At HackUConn, there's a spot for everybody in every major.

## What are the perks?

During the 24 hours, students will have access to workshops and mentoring from leading industry professionals. Participants will be provided food, from catered meals to midnight pizza! Last but not least, there will be SWAG for all and cash prizes for the winning teams.

## How can YOU get involved?

If you're interested in being an event volunteer or participating on a team or as an individual, email [hackuconn@gmail.com](mailto:hackuconn@gmail.com) or go to [hackuconn.org](http://hackuconn.org) for more information!
